

TEST DRIVER'S CONDITION

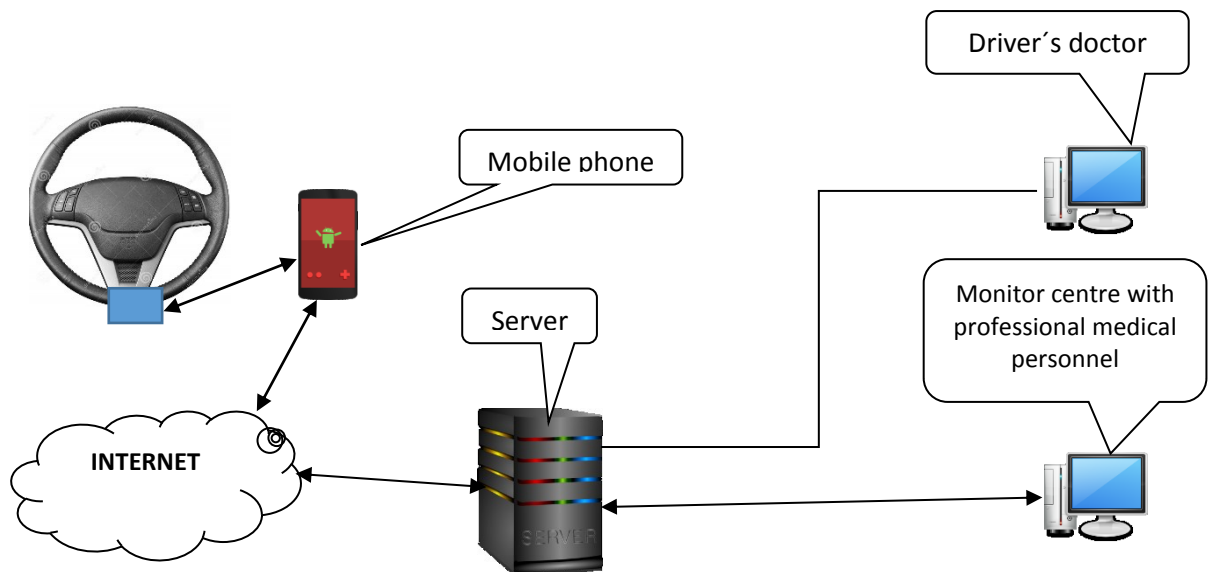

PREVENTS ACCIDENTS CAUSED BY:

- MICROSLEEP
- STROKE
- HEART ATTACK
- ARRHYTHMIA
- TIREDNESS
- PURE PSYCHICAL CONDITION

HOLD THE STEERING WHEEL FOR 30 SECONDS TO KNOW WHAT SHAPE FOR DRIVING YOU ARE IN.

Monitor is sensing and evaluating signals. Results including values and curves, driver's conditions, arrhythmia, ECG, pulse are displayed on driver's mobile phone and transmitted to monitoring center with doctors and medical personnel where driver can call for evaluation any time.

Based on this information driver can decide if continue with driving. Driver can also chose his own doctor, which will get access to the server with a password.
